

SmartSort™ Release Notes

Requirements

Microsoft Dynamics GP 2013 R2 must be installed. Microsoft Dynamics GP SmartList must be installed, and security must be set to allow access to alternate lookup windows (Advanced Lookups) in the SmartList dictionary.

Registration Keys

If updating from Dynamics GP 2010 or earlier, you will need to obtain new registration keys from your Microsoft Partner or EthoTech. This product is fully functional in the Dynamics GP sample company.

Installation Instructions

Please refer to the SmartSort Installation Guide for detailed installation and update instructions.

Build 12.00.300 Release Date July 22, 2014

Added support for Dynamics GP 2013 R2.

When the Customers lookup window is opened from the Sales Transaction Entry window, SmartSort functionality is now enabled.

Build 12.00.4 Release Date March 12, 2013

The SmartSort User Options window now includes an option to clear the Dynamics GP default view for a lookup window.

Build 12.00.3 Release Date March 8, 2013

Navigation to the SmartSort Setup window was moved to the Dynamics GP Setup >> System menu.
